

## Confidence to the MAX

### Maximum Performance

- Premium formulation that includes Transorb® II Technology
- Transorb II Technology delivers a lethal dose of weed-killing power within minutes for unsurpassed weed control in tough conditions, on tough weeds
- 22 percent higher surfactant loading than the competition
- Improved tank-mix compatibility

### Maximum Support

The full risk-sharing benefits of:

- 30-minute rainfast warranty
- Tough weeds, tough conditions warranty
- Enhanced volunteer corn cost-share incentive
- Professional, local service and support

### Maximum Crop Safety

- Proven crop safety in more than 3,000 side-by-side field research plots over a two-year period, to help maximize yield potential

## Roundup Ready PLUS® Crop Management Solutions Incentives

- **Higher incentive rates available** when using Roundup WeatherMAX® in conjunction with recommended residual herbicides in your corn and soybeans

# ROUNDUP POWERMAX® HERBICIDE

SITE OF ACTION GROUP

## Powerful, Consistent, Proven Control of Tough-to-Manage Weeds

### Powerful Weed Control

The latest formulation offers the powerful weed control you would expect from the Roundup® brand agricultural herbicide family.

### Consistent Weed Control

Offers enhanced consistency of control, weed to weed and field to field, even on hard-to-control weeds such as:

- Velvetleaf
- Purslane
- Morningglory
- Lambsquarters
- Canada Thistle

## Proven Performance

Has consistently outperformed certain imitator herbicide products in greenhouse and field trials.

Roundup PowerMAX®

Imitator A

Imitator B

Imitator C

**SOURCE:** Efficacy tests were conducted on velvetleaf at the labeled rate of 0.75 lb. a.e./acre, which is equivalent to 22 oz./acre of Roundup PowerMAX® and 32 oz./acre of the other products or equivalent rate to deliver 0.75 lb. a.e./acre. Images from Monsanto Greenhouse Test 2008A08028 taken 11 days after treatment.

CROP MANAGEMENT IS YIELD MANAGEMENT

**Roundup Technology®** includes Monsanto's glyphosate-based herbicide technologies. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
